IAN McALLISTER & ANDREW NIKIFORUK: WOLVES, BEETLES & A PIPELINE

**Monday, October 24, 2011,
7:30 – 9:00pm
Town Hall-\$5
1118 Eighth Ave
Seattle, WA**

Ian McAllister's new book is called **Following the Last Wild Wolves**; Andrew Nikiforuk has written **Empire of the Beetle**. While wolves and beetles don't seem the most likely pairing, they each play a crucial role in our ecology—as do the authors.

Together, McAllister and Nikiforuk find common ground around Canada's Enbridge Pipeline and its impact on the pristine wilderness of northern British Columbia. McAllister addresses the beauty and ecology of the coast and forests—and the threats of bitumen exports—while Nikiforuk explores landscape changes triggered by climate change (oil consumption) and the second-largest insect invasion in North American history.

Presented as part of Seattle Science Lectures, with Pacific Science Center and University Book Store. Series sponsored by Microsoft. Series media sponsorship provided by KPLU.

Tickets are \$5 at www.brownpapertickets.com or 800/838-3006, or at the door beginning at 6:30 pm. Town Hall members receive priority seating. See townhallseattle.org for more information.

Following the Last Wild Wolves by Ian McAllister

Ian McAllister, award-winning author and photographer of **Following the Last Wild Wolves**, presents a multi-media presentation of the salmon eating wolves of Canada's rainforest and the threats they face by a massive oil pipeline. In this updated text edition of **The Last Wild Wolves**, McAllister shares his intimate observations, including new experiences since the last book, of a genetically distinct population of wolves over a twenty-year period and offers a rare glimpse into this majestic animal's fascinating, complex way of life.
